

Lucas Acosta

Front-End Developer

EXPERIENCE

Front-End Developer - Availroom.com - Currently *Booking Engine Embeddable - Coleader*

Booking Engine is a widget built in [React](#), packaged and compiled by [Webpack](#) to be embeddable in our client's pages. Used in more than **150 different sites**. More than **3000 monthly** bookings. I [designed](#) the FrontEnd architecture, contributing to the selection of technologies to be used in the project. I [taught](#) and [mentored](#) some team members, helping them throughout the process of building and maintaining the application. Implemented a [CI/CD](#) system in [github actions](#).

Checkin App - Coleader

Checkin App is an application built in [React](#) that handles checkins and checkouts of our client's users. Some challenges we faced in the application was to integrate an [SDK](#) to extract information from documentation. We also connected home [domotic](#) locks through requests to the BackEnd. Handled more than **3800 reservations** per month. More than **1000 apartments** with [domotic](#) openings. [Design](#) the communication system between the web and [flutter](#) together with the mobile team. [Design](#) the FrontEnd architecture, contributing to the selection of technologies and design patterns to be used in the project.

Property Management System (PMS) - Coleader

Property Management System is a web application that simulates a web operating system built in [React](#) and [Redux](#). This [web OS](#) is used by our clients to manage all their *properties*, their sales *channels*, their *rates*, their *cleaning team*, their *home domotic* devices, their *reservations* and much more. Managed more than **200 clients** spread throughout Spain, Mexico, Italy, Argentina, Ecuador, etc. More than **10000 apartments** managed. More than **50,000 monthly users**. I [created](#) a [microservice](#) built with [Node](#) that, with [web sockets](#), allowed some windows to be real time team collaboration (like in figma). [Design](#) the FrontEnd architecture, contributing to the selection of technologies to be used in the project.
